

Index of all persons named in

The Electrical Age

(1926 - 1985)

This index lists every named person recorded across the digitised issues of *The Electrical Age* ((1926 - 1985)). Names are presented in surname-first (inverted) form, as is standard in archival finding aids, with a separate location reference for each individual appearance in the source material.

Each citation gives the volume and issue number, year, and page number where the person is recorded. Appearances are ordered chronologically by volume and issue, then by page number within each issue. Where the same page gives rise to multiple source rows (for example, because different roles were recorded separately), the location reference is listed once only. Researchers wishing to know the article title, role, or contextual detail for a given appearance should consult the accompanying spreadsheet or the digitised issue directly.

Persons with 15 or more appearances are presented in a compact run-on style: all location references are gathered into a single indented paragraph separated by semicolons, with a count of total source records given at the start of the entry. This prevents the most frequently mentioned individuals from occupying disproportionate space in the index.

Where the same person appears under variant spellings or name forms, all appearances have been standardised to a single canonical headword following a manual review of fuzzy-match candidates. Variant forms have been silently merged into the preferred headword.

Titles (Mr., Mrs., Miss, Dr., etc.) are preserved in the headword where they form part of the name as printed in the journal, or where they assist researchers in identifying persons whose given names are not otherwise recorded. Location references take the form **Vol X, No Y (YYYY), p. Z**.

The digitised volumes may be accessed via the links below. Clicking a link in a compatible PDF viewer will open the corresponding archive file directly.

Appendix: Index of Depicted Persons

This appendix lists all persons who are recorded as depicted (i.e. appearing in a photograph or illustration) in the digitised issues of *The Electrical Age* ((1926 - 1985)). It is a subset of the main index: only appearances for which the 'Depicted?' field is marked 'Yes' in the source data are included here.

Entries follow the same format as the main index: names are given in surname-first (inverted) form and each citation shows the volume and issue number, year, and page number of the depiction. Where a person is depicted more than once on the same page, that location is listed once only. Entries are ordered alphabetically by headword and, within each entry, chronologically by volume and issue then page.

Researchers should note that the depicted status reflects the source data as recorded during the indexing process. In some cases a photograph caption may name a person who appears only partially or at a distance; the caption text and the digitised image should be consulted for confirmation.

The digitised volumes may be accessed via the links below. Clicking a link in a compatible PDF viewer will open the corresponding archive file directly.
